LeetCode

GFG

Technical Expertise

- **Programming:** Java 8/11, Javascript, SQL
- **Frameworks:** Spring Boot 3, Hibernate, JDBC, JPA, React js
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Messaging & Streaming:** RabbitMQ, Kafka Streams, Azure
- **Architecture & APIs:** Microservices, Event-Driven Architecture, REST APIs, MultiThreading, Caching
- **AI Tools & Models:** ChatGPT (GPT-4/5), Claude (Anthropic), GitHub Copilot for development
- **Certifications :** Microsoft AZ-900 , Google Cloud 12 Skill Badges , Gen-AI Certified
- **Soft Skills & Tools** Agile, Kanban, Postman, Scrum Experience, Agile

EXPERIENCE

Tata Consultancy Services (System Engineer) |

March 2024 - Present

- Designed and delivered production **RESTful microservices** using **Spring Boot** and Node.js, primary technical point of contact for API design and stakeholder alignment across project modules.
- Implemented request batching with retry logic and **exponential backoff** to handle Azure API rate limiting – reduced HTTP 429 errors by **20%**, enabling throttle-free large-scale dataset ingestion.
- Developed a **multithreaded data ingestion pipeline** using **Java Concurrency Utilities** (ExecutorService, CompletableFuture) across 6 **AKS** node pools – achieved **50% reduction** in batch time (20s to 10s).
- Provisioned a full **Azure cloud environment** with **CI/CD pipelines** (YAML) and **Azure Functions** for serverless orchestration, enabling zero-downtime automated releases.
- Optimized **Cosmos DB** partition key strategy to eliminate hot partitions – cut **RU consumption 7% per hour** and reduced operational cloud costs.

Personal project

MediLink AI |

2025

- Built an AI-powered healthcare platform using **Spring Boot** microservices, deployed on **Azure Kubernetes Service (AKS)** with container orchestration, designed to handle high traffic and ensure service reliability.
- Developed a **RAG-based AI health assistant** using **LangChain** and **pgvector**, enabling patients to get relevant health information and helping doctors with basic diagnostic context from medical records.
- Integrated **Azure AI Document Intelligence** to extract and parse medical report data, reducing manual data entry and making report review faster for clinical staff.
- Built REST APIs in **Java** and **Spring Boot** to securely expose patient vitals, medication records, and lab results, with strict access control ensuring only authorized users can query patient data.
- Implemented authentication and authorization using **Spring Security** with **JWT tokens**, **BCrypt** password hashing, and basic field-level encryption to protect sensitive patient information.

Coding Platforms

- **LeetCode:** Solved **200+** problems -
- **CodeChef:** **3star** Highest Rating (**1620**) -

EDUCATION

RCC Institute Of Information Technology, Kolkata
B.Tech - Information Technology - CGPA- 8.25

2019 – 2023
Kolkata, India
